MAAC Machinery Company, Inc. / www.maacmachinery.com

JOB TITLE: Machinery Design Engineer (Full-Time)

ABOUT US: MAAC is an industry-leading **Machine Manufacturer** serving the plastics industry. Established for over 40 years, MAAC is a privately-owned and operated business designing and building custom thermoforming machinery. At MAAC we work hard to deliver a great, built-to-last machine. We maintain a strong focus on the development of our teammates. MAAC is experiencing growth and is looking to attract talented and motivated individuals to join our team.

ABOUT THE JOB:

Schedule:	Monday thru Friday; 8:00am to 5:00pm
Location:	590 Tower Blvd, Carol Stream, IL (DuPage County)

Are you a talented **Machinery Design Engineer** looking for a new challenge? We're a leading company in the thermoforming machinery manufacturing sector and are seeking a skilled and innovative engineer to join our growing team.

What You'll Do

In this role, you'll be responsible for the full lifecycle of machinery design, from concept to completion. You'll work closely with our production teams to create cutting-edge equipment that meets the highest standards of efficiency and reliability. Your responsibilities will include:

- Developing detailed mechanical designs using CAD software.
- Performing calculations and simulations to ensure structural integrity and performance.
- Creating and maintaining technical documentation, including blueprints and specifications.
- Collaborating with vendors and suppliers to select and integrate components.
- Specification of motor hp, gearbox torque, bearings and shafts for various applications.

Who We're Looking For

We need an engineer who is not only technically proficient but also a creative problem-solver. The ideal candidate will have:

- Prefer a Bachelor's degree in Mechanical Engineering or a related field but not required.
- Proven experience designing automated assemblies.
- Familiarity with CAD software (Autodesk Inventor preferred, AutoCAD 2D, etc.).
- An understanding of materials science, mechanics, and manufacturing processes.
- At least 5 years of relevant work experience.
